Experience

10/2023 to Present: Senior Asst. Director, Egen Solutions LLC

During my tenure as a Senior Assistant Director of Data Engineering at Drive Time Automotive Group, I had the privilege of overseeing a team of 12 highly skilled engineers, comprising data engineers, product owners, and a dedicated testing team. In my capacity as a Senior Assistant Director, my role was pivotal in setting the technical direction and ensuring alignment with our data-driven marketing goals, facilitating the delivery of top-tier results. This well-structured team dynamic was instrumental in the execution of intricate projects with a high degree of technical complexity.

One of the standout technical accomplishments during this period was my leadership in driving the development of advanced data-driven marketing platforms, encompassing both email and SMS campaigns. These platforms seamlessly integrated with Pega CDH, leveraging the power of Pega's decisioning capabilities and harnessed the capabilities of customer data platforms like Snowflake and Twilio. This transformative initiative redefined our marketing approach, resulting in a substantial surge in customer engagement and conversion rates, achieved through personalized email and SMS campaigns.

My specialization in Data, AI, and ML solutions played a pivotal role in crafting adaptive models within the Pega platform, enabling real-time adjustments to email and SMS marketing strategies. This adaptability greatly enhanced

the precision of our campaign targeting, leading to a notable increase in campaign success rates. Moreover, my team's technical prowess in tailoring email and SMS campaigns for the automotive sector bore significant fruit, contributing to a remarkable revenue surge of 3 million dollars. These campaigns were meticulously designed to capitalize on data-driven insights within the Pega platform, ensuring resonance with our target audience. As a collaborative leader with a deep understanding of the Pega Decisioning capabilities, my strategic role was pivotal in executing omnichannel email and SMS communication strategies within Pega to provide customers with personalized and consistent interactions across diverse marketing channels. Consequently, our organization succeeded in elevating customer engagement and loyalty, cementing our reputation as a Pega-driven data-driven marketing leader within the automotive industry.

11/2021 to 09/2023 Director, Ally Financial

During my tenure as the Director of Data Management at Ally Financial from November 2021 to October 2023, I spearheaded a significant initiative by successfully implementing the Pega Customer Decision Hub (CDH) application. This strategic implementation played a pivotal role in delivering a seamless omnichannel marketing experience for Ally Financial's customers, extending across email, IVR, web, and mobile channels. Through the integration of Pega CDH, we achieved a unified and consistent approach to customer interactions, ensuring that each touchpoint was personalized and relevant. My leadership extended to the development and execution of customer segmentation strategies, independent of marketing strategies, which led to highly tailored and meaningful interactions with both prospective and existing customers. Furthermore, I took proactive steps to optimize customer segmentation and personalization capabilities within the Pega CDH platform, contributing to a substantial enhancement in customer engagement and overall satisfaction.

In addition to my technical leadership, I played a pivotal role in fostering cross-functional collaboration and alignment within the organization. This involved conducting informative business sessions to educate stakeholders on how to effectively leverage Pega for marketing purposes. This initiative not only improved our overall collaboration but also enabled us to better translate business requirements into actionable customizations within the Pega CDH application. Furthermore, I actively collaborated with business and channel product owners to gather requirements, ensuring that their needs were accurately translated into technical solutions. My responsibilities also extended to data analysis using platforms like Snowflake to create data transformation strategies that enabled seamless integration with Pega. Throughout this endeavor, I provided thought leadership to project implementation and resource management, ensuring the successful completion of the project within the specified timeline and budget. To effectively communicate project progress and outcomes, I presented project overviews to executive and senior directors, showcasing the positive impact on our marketing initiatives and customer experiences.

01/2015 to 10/2021: Senior Pega Specialist, Accenture Consulting

Led the development of the groundbreaking Advanced Integrated Personalization Platform (AIPP), redefining omnichannel marketing by leveraging Pega CDH and Adobe solutions. AIPP delivered highly personalized customer experiences, resulting in substantial cost savings and revenue generation. Its implementation became a benchmark for client investments. It is projected to save \$2.5 million from legacy marketing tools over 3 years

In addition to technical leadership, I assumed end-to-end project ownership, managing resource allocation, budgets, and solution architecture. This comprehensive approach consistently delivered exceptional value to clients and ensured cost-effective project completions within budget and timeline constraints.

I played a pivotal role in client onboarding and project planning, leading discovery sessions, crafting RFPs, and developing detailed project plans for new clients across diverse industries. These strategies contributed to increased client acquisitions and generated additional revenue streams.

Through team leadership and productivity enhancement efforts, I mentored development teams, assigned technical requirements, and fostered creativity to deliver innovative Pega solutions. This leadership led to a significant increase in team productivity, enhancing efficiency, and client satisfaction. Additionally, I managed application support activities, optimizing application performance and responsiveness.

Talent development and growth were central to my responsibilities. I facilitated promotions and ratings for team members based on performance, identified high-potential individuals for critical assignments, and ensured continuous professional growth in technical, functional, and project management capabilities.

I designed application enterprise rulesets and class structures, establishing a robust foundation for future scalability and customization, which reduced development costs.

Furthermore, I created REST Integration Services to seamlessly integrate Pega CDH with platforms like IBM Watson and Adobe Tech stack (AEP, AEM, Analytics). This integration improved cross-channel marketing effectiveness and generated additional revenue.

Lastly, I developed data-driven marketing strategies that determined optimal offers based on customer data, resulting in personalized and relevant customer interactions and substantial revenue growth.

These accomplishments underscore my expertise in Pega decisioning, project management, team leadership, and innovation, contributing significantly to the success of multiple clients during my tenure at Accenture.

08/2014 to 1/2015: Pega Specialist, Virtusa Consulting

In my role as a team leader, I had the privilege of guiding and mentoring a team of three dedicated professionals, nurturing their growth across various facets of our project. This involved not only imparting technical knowledge but also fostering a culture of collaboration and continuous improvement within the team.

Additionally, I played a crucial role in supporting our end-users by addressing and resolving defects reported in Quality Center (ALM) promptly and efficiently. I approached this task with meticulous attention, ensuring that each issue was thoroughly analyzed, and accurate solutions were provided. This commitment to precision and problem-solving enabled us to maintain a high standard of quality in our project deliverables.

Furthermore, I took charge of the deployment process during application releases across multiple environments, including UAT, QA, and PROD, utilizing Unix systems. In this critical phase, I not only handled the technical intricacies of deployment but also played a pivotal role in debugging defects and ensuring that our solutions were delivered within the Service Level Agreements (SLAs). This proactive and results-driven approach contributed significantly to the overall success of our project and the satisfaction of our end-users.

06/2010 to 01/2013, Associate Software Engineer, Accenture Consulting

My role involved the end-to-end development of the application, rooted in the functional requirements provided. Collaborating closely with leads and business analysts, I played a pivotal role in defining and analyzing business requirements, which served as the foundation for the design and testing phases. This collaborative effort ensured that our solutions precisely aligned with the clients' needs. I actively engaged in crafting the user interface, where I designed and developed Harness rules, Layouts, and Sections, ensuring an intuitive and seamless user experience. Additionally, I took charge of creating data models and UI components such as Sections and Flow actions, tailored specifically to the use cases at hand. This holistic approach to development allowed us to deliver solutions that not only met but exceeded our clients' expectations in terms of functionality and user-friendliness.

Significant Performance

01/2015 to 10/2021: Developed Accenture Intelligent Personalization Platform (AIPP), driving over \$5 million in cost savings and revenue generation, making it a pivotal innovation for businesses in the USA across industries, solidifying its technological leadership and economic impact.

11/2021 to 9/2023: The development of the Customer Interaction Hub at Ally Financial, a critical component in achieving Ally's marketing goals and ensuring seamless omnichannel communications. This groundbreaking initiative has not only transformed Ally's customer service but has also emerged as a national model for driving digital transformation across customer service in the United States.

Information Services & Technology Committee

Board Details

The Information Services & Technology Committee serves as an advisory group to the Board of County Commissioners and reviews plans at a conceptual level for major new automated systems with respect to justification of the system; adequacy of the system functions; appropriateness of the technical approach; availability of technology and personnel resources; to advise on how business as a whole is accomplishing or approaching challenges; and, to provide feedback to the Board when necessary on ITS challenges.

Overview

- **Size** 12 Seats
- **Term Length** 3 Year
- **Term Limit** 2 Terms

Contact

- **Name** Keri Carver
- **Phone** (980) 314-2152

Additional

Qualifications

Members should have expertise in managing Information Systems. Persons serving must be a resident of Mecklenburg County. Appointed members must attend a minimum of 65% of all scheduled meetings in a calendar year and cannot miss three consecutive meetings. Failure to comply with attendance requirements will result in removal from the advisory board.

Advisory Board Details

The Committee validates the processes associated with implementation of automation plans including those used in the selection of equipment and service vendors. While performing these duties, the Committee provides appropriate coordination with any existing advisory bodies that may also have interest in the planned systems. The Committee reviews the plans of the ITS Department, of major automation projects and periodically reports to the Board of County Commissioners as to the same if necessary.
