I have spent the last 12 months advocating for safer schools, learning policy, procedure, & coming up with creative & effective ways with the use of multiple layers of technology & embracing & building relationships with community advocates to provide positive mentorship programs inside the schools to reduce the violence & keep weapons out of our schools & out of our young peoples hands in the community. I am the " MOM " who got the " Thermal Weapon Detection Systems inside CMS Schools " & Effectively communicated the interior & exterior camera tech & function to get that in the Schools also.

Area of expertise and interests/skills

I AM the Mom who got the Thermal Weapon Detection Systems into CMS Schools, I have effectively provided a solution to keep weapons & other items out of our Schools. the " Scanners & the Cameras are a layer of a comprehensive strategy to not only secure our Schools but ultimately our Community & can be useful in securing our critical infrastructure. There is additional " tech " I have identified to cover the open areas that is cost effective, portable & highly effective. to include other details that will help with the explosives threats that i would not like to put on paper / public record if thats okay but will gladly discuss in depth if you would like & have done so prior with an sbi officer who liked the idea. I began to take an interest in thermal, flir & what uses it can serve the community in an out of the box way when my Husband was an Active Duty United States Soldier his Career as an Infantryman always brought us both great pride & I love(d) learning & Thermal tech just fascinates me.

Additional Comments

Last November when three handguns were found at Hopewell High School in one day I felt like we as a community were running out of time before a shot was fired in our schools. Our young people were just experiencing so much violence & so many lives were lost to senseless violence I thought I may be able to change it, but you don't know unless you try. So I introduced a former CMS BOE member to thermal technology & the possibilities of it & how it could help. I researched & found " Dad's on Duty " & the Board Member came up with Mom's on a Mission & a very successful program was born. During this time I was having numerous health challenges & I am very grateful for the Staff of CMS who helped bring this into reality, Mid way between my Mastectomy & Reconstructive surgery I was able to communicate the holes that i observed just from looking into the events that were occurring I was able to effectively give the info to a former CMS BOE member on how to secure that & to remove those holes in the program. I want to be a part of the program I helped start from day 1 more then anything & work with the BOCC & Committee to truly fulfill the original goal which has happily stayed true to but has become bigger then i could have ever hoped or wished for a year ago of - Our Children deserve an education they do not have to recover from & our Community deserves to live without fear. We are One Town One Team with ONE GOAL. Safety. I believe if Char Meck works together we can do anything & there is no I in team. even if I am not able to be a part of this team, I am very humbled & truly grateful that this long shot Hope of mine has helped our community & our kids the way it has. Thank You.
