Title:
Health Department Amended Fee Schedule

Summary

ACTION:

Approve the new fees for new services as noted below:

<u>Code</u>	<u>Description</u>	<u>New Fees</u>	<u>Program</u>
90750	Shingrix	\$138.60	Immunization Program
T1029	In-Home Lead Investigation Program	\$473.00	Environmental Health
83036	Hemoglobin, glycated	\$ 11.97	Family Planning

Staff Contact: Gibbie Harris, MSPH, BSN, Health Director

Presentation: No

BACKGROUND/JUSTIFICATION:

The Advisory Committee on Immunization Practices (ACIP) recommends administering Shingrix in place of Zostavax (the existing Shingles vaccine). This product is formulated to be administered to a wider range of clients and thus is medically superior to Zostavax.

The Division of Medical Assistance has created a procedure for local health departments to bill Medicaid directly for in-home lead investigations. This is a comprehensive environmental lead investigation. The Department has the ability to bill this service as of July 1, 2018.

The North Carolina Division of Public Health Women's and Children's Health Section is requiring testing of diabetes for the Family Planning clients. The Hemoglobin, glycated testing will fulfill the requirements as outlined in the NC Division of Public Health Family Planning Agreement Addendum.

PROCUREMENT BACKGROUND:

N/A

POLICY IMPACT:

N/A

FISCAL IMPACT:

No fiscal impact. These new fees are not expected to generate a significant revenue impact for the County. The actual collection will be evaluated during this fiscal year.
